Active Vision Project Closure Report

1. Project Overview

Project Title: Active Vision

Team Members: Zhiyuan Lu (Spokeperson), Tao Lu (Spokeperson), Xi Ding, Yichi Zhang, Xingchen Zhang, Pei Ling Lam

Clients: Arjun Raj, Dr Lei Wang, Mr. Francis William

Active Vision is an Android application that leverages computer vision models to analyse tennis player movements in real time. The app aims to assist players and coaches by providing live player detection, pose estimation, court detection, and ball detection with speed calculation.

2. Project Completion Criteria

Feature	Priority	Status and Notes
Player detection	High	Implemented
Player pose estimation	High	Implemented
Ball detection	High	Implemented
Court detection	High	Implemented
Calculate tennis ball speed	Medium	Implemented
Replace TrackNetv2 with TrackNetv4	Medium	Tested but poorer result than TrackNetv2
Improve app user interface	Low	Implemented
Improve robustness of existing model	Low	Not implemented due to integration risk late in project cycle

3. Project Outcome

Demo

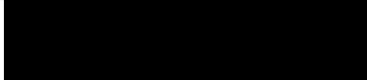

4. Closure deliverables checklist

GitHub link: <https://github.com/Darcyddx/Active-Vision/tree/main>

Deliverables	Check
Final Product / Prototype (Located in Android/ on GitHub)	Yes

System architecture diagram	Yes
Data flow diagram	Yes
User manual	Yes
Installation guide	Yes
Codebase documentation (inline comments + README)	Yes
Meeting minutes	Yes
Daily scrum	Yes
Sprint reflections	Yes
Backlog	Yes
Poster and video pitch	Yes

5. Sign-off

Client Name	Signature	Date
Mr. Francis William		26 May 2025
Dr Lei Wang		25 May 2025
Arjun Raj		26 May 2025

By signing this document, I grant approval to formally close this project and complete the hand-over activities as described above.
